Clinical and Systems Transformation Project Update, July 4, 2013

Clinical Information – *When and where required*

Imagine this: A patient comes into your facility with an acute episode of asthma. At the clinicians' fingertips is an order set that not only is based on best practice but has links to the evidence that informs this care. As the order set is completed other members of the team are notified of the actions required so the care can be timely and coordinated. That is just one example of what clinicians will be able to do when the Clinical and Systems Transformation Project is fully implemented within VCH, PHC and PHSA.

Demonstrations of the new Clinical Information System (Cerner) have been arranged for staff and physicians. This will provide an opportunity to gain an initial or deeper understanding of some of the future capabilities that we will be designing through the Clinical and Systems Transformation Project.

Cerner Demos Next Week – *come in person or follow on-line*

note: you are welcome to attend any one of the following sessions, choose the location that works best for you.

Tuesday, July 9
7:00am – 9:30am, C&W Clinical Support Building, 2nd Floor, Room CSB V2-222
12:00 – 2:30pm, VGH, Diamond Health Centre, 1st Floor Lecture room 1020 LT
5:00pm – 7:00pm, St. Paul's Hospital, Large Lecture Theatre, Level 1, Providence Building

Wednesday, July 10
8:00am – 10:30am, Lions Gate Hospital, Basement Auditorium
1:30pm – 3:00pm, Richmond Hospital, Auditorium

If you are unable to attend the above session in-person, please log-in via:
Conference Line and Web Meeting Link: Join the meeting

Dial the conferencing service directly, and enter the participant code:
Toll-free: +1-866-921-6338; Participant Code: 0206379

FIRST-TIME USERS to Live Meeting
To save time before the meeting, check your system to make sure it is ready to use Office Live Meeting.
Please install the Live Meeting console one day before your meeting by clicking the following link:
https://www.livemeeting.com/cc/cerner/join?id=install&role=attend

Question of the Week

Does Cerner have adequate capacity to handle all our order set requirements?
A review is underway to understand the requirements for clinical protocols and order sets. Cerner has the capability to handle it all and the CST Project Team is aware of the complexity. Clinical Design Teams will review requirements and ensure processes and systems meet the needs of all health organizations

---

Leveraging Lessons Learned
One industry-proven tool being considered by the CST Project Team is Zynx, a commercially available, evidence-based order set content management tool. It offers a starter set of evidence-based content and has been adapted to the Canadian health system by Cerner users in Ontario. Clinicians will leverage this existing work rather than create content from scratch.

Zynx Demos Tuesday, July 16
9:30am – 10:50am, BCCA, Gordon and Leslie Diamond Family Theatre, 600 W. 10th Ave.

1:30pm – 3:15pm, PHC, Hurlburt Auditorium, St. Paul's Hospital

4:30pm – 5:45pm, VGH, Diamond Health Centre, 1st Floor, Lecture Room 1020 LT

If you are unable to attend the above session in-person, please log-in via:
